

Strategy Inception: 29/05/20

YTD Return: 14.55%

MTD Return: 4.23%

Objectives & Investment Strategy

The strategy's **objective** is to generate **high-quality risk-adjusted absolute returns** to achieve long-term capital appreciation through different regimes while maintaining a **low correlation to traditional investments**, common CTA's and other hedge funds.

It invests in long and short derivative instruments utilizing **5 proprietary sub strategies**, offering an exposure to commodities, currencies, equities, volatility and fixed income with a diversified, non-discretionary, quantitative and systematic investment approach.

Commodities: applied to a well-diversified allocation including petroleum, energy, metals and agriculture.

Currencies: applied to a well-diversified allocation including CAD, MXN, EUR, GBP, CHF, AUD, NZD and JPY.

Equities: applied to a well-diversified world indices allocation including the United States, Canada, Europe, India, China, Hong Kong, Australia and Japan.

Fixed Income: applied to a well-diversified world STIR and government treasuries allocation including the United States, Canada, Europe, Australia and Japan.

The strategy's liquidity management holds cash and US-T-Bills in significant proportions, that may vary from 70% and up to 100% of the net asset value.

The proposed investment horizon is **3 years**.

Net Performance Since Inception vs Benchmarks (growth of \$100)

The Zindel Global Diversified Strategy is an absolute return strategy independent of any benchmark. The benchmarks proposed here serve just as a general guidance tool of the managed futures space. **Both benchmarks are non-investable indices** that represent an average of hedge funds. The Bloomberg CTA Hedge Fund Index includes funds with a CTA strategy (usually mostly focused on pure trend-following strategies) and the Bloomberg Macro Hedge Fund Index includes funds with a macro strategy (usually including discretionary fundamental strategies).
