

OBJECTIVES & INVESTMENT STRATEGY

The strategy's **objective** is to **generate superior risk-adjusted absolute returns** to achieve long-term capital appreciation while maintaining a low correlation to traditional investments.

It invests in long and short derivative instruments offering an exposure to fixed-income with a diversified, non-discretionary, quantitative and systematic investment approach.

The strategy utilizes **5 proprietary sub strategies** applied to a well-diversified world STIR and government treasuries allocation including the United States, Canada, Europe, Australia and Japan.

The strategy may hold cash or equivalent in significant proportions, potentially up to 100% of the net asset value.

The proposed investment horizon is **3 years**.

Zindel Quant Factory currently advises an open-end fund incorporated in Luxembourg that utilizes the ZCGFI Global Fixed Income SC II strategy as part of its derivative instruments. Data in this factsheet represents net results after fees of **1.5%** management and **15%** performance.

DISCLAIMER

This presentation is provided for general information only and nothing contained in the material constitutes a recommendation for the purchase or sale of any security, nor an invitation to invest in the following strategy. Although the statements of fact in this report are obtained from sources that we consider reliable, we do not guarantee their accuracy and any such information may be incomplete or condensed. Also, views expressed in this presentation are based on research materials available from sources considered reliable. Views are subject to change based on additional or new research, new facts or developments. The investment risks described herein are not purported to be exhaustive. The persons interested on investing in this strategy need to be well informed Investors as per local regulations. Any person considering an investment should seek independent advice on the suitability or otherwise of the particular investment. Investment products are not insured by government or governmental agencies. Investment and Treasury products are subject to investment risk, including possible loss of principal amount invested. Past performance is not indicative of future results: prices can go up or down. Investors investing in investments and/or treasury products denominated in foreign (non-local) currency should be aware of the risk of exchange rate fluctuations that may cause loss of principal when foreign currency is converted to the investors home currency.

* 2000 to 2017 back test results from KPMG audit report. 2018 to 02/2020 validated back test. Strategy launched in March 2020.
